

CONV 8 OHM 0DB

Features

Simply connect this converter to the right and left outputs of a low impedance amp 8Ω (max 80W per channel), and on the other side you get a line-level signal on RCA connection (right and right Left) with an adjustable level of 0a 2V.

Compact design for easy installation (plug and play).

This product is perfectly suited to the MAJORCOM PM-835 and 837 turntables.
