

# COR RCAM-F ISOLATEUR

## Ground loop isolator

The ground loop isolator is used to eliminate any electrical and hum noise that is caused by earth loops via audio lines. A ground loop is an undesirable current within a driver that leads to major noise issues and interference with audio, video and computer systems. This ground isolator offers a quick and easy solution for use in professional and consumer audio systems.

## Specification

- Eliminates snoring and noise from ground loops in audio systems
- Its small size makes it ideal for easy and discreet installation.
- **Color:** Black
- **Materials:** ABS
- **Connector:** 2x MALE RCA, 2x female RCA
- Passive device
- **Frequency range:** 20-30 kHz
- **Size:** 3.5-3.5-6 cm
