

MICHF-PRO MAIN-S

Hand transmitter and wireless receiver True Diversity set

- Wireless handheld microphone with analog transmission, it combines reliability with ease of use.
- It delivers excellent audio quality with a frequency response close to the wired version and offers up to 12 compatible frequencies per band.
- It is characterized by its ease and speed of implementation thanks to its integrated antennas.
- The rack-mountable receiver is suitable for fixed and economical installation. Its detachable antennas allow the use of antenna offsets and antenna distributors.
- Regardless of the environment, the QuickScan function will find the best possible frequency ensuring a stable transmission.
- Simple complete system for singers and entertainers.
- Composed of a receiver with single and double rack mounting kit and a front panel antenna mount, a handheld transmitter equipped with a cardioid dynamic capsule and a microphone clamp.

Model	MICHF-PRO MAIN-S
Transmitter screen display	no
Power	Transmitter : 2 AA batteries, Receiver : power supply
Removable antennas	yes
Autonomy	Up to 14 hours
Bandwidth	662 to 686 MHz
Capsule	dynamic
Interchangeable capsule	no
Category	complete voice system
Transmit encryption	no
Directivity	cardioid
Max number of concurrent systems	12
Transmission coverage	100 m
RF Transmitter Output	10 mW
Audio Frequency Response	50 Hz - 15 kHz
Frequency scanner	yes
Transmitter sync	QuickScan
Transmission	analogue
Screen	LCD display on the receiver with detailed RF and audio metering
Housing	Molded ABS
Audio output level	adjustable
Antennas	1/4 wave detachable
